Human Life

Obama does not know when life begins and refuses to support any legislation that gives rights to children from conception.

John McCain believes life begins at conception and has been asked to support a number of "personhood" bills but has refused every time. McCain refused to co-sponsor U.S. Senator Roger Wicker's life-saving S.3111 and refuses to endorse Colorado's historic Personhood amendment initiative which is on their statewide November ballot.

Embryonic Research

Obama advocates medical experimentation on the tiniest babies because he doesn't know when life begins.

McCain says life begins at conception but advocates medical experimentation on these tiny babies.

Gay Marriage Ban

Both McCain and Obama are against banning gay marriage in the Constitution. McCain came out in opposition to Bushes support for such a ban in 2004.

Funds Abortions

Obama supports paying for abortions in some circumstances.

The official Senate.gov site documents McCain's [Yea vote](#) on the Health and Human Services Appropriations Public Law 109-149 and the Government Printing Office documents that McCain's vote authorized funding for surgical abortion.
